

# Youth Art Contest!

300 white beach balls are available for you to design your own planet. If you oversaw the oceans, archipelagos, islands, and fjords what would you do? This is your chance to make your own planet. Maybe the seas are full of soda? Maybe instead of New York you have the state of New York Peppermint Patty and the dirt tastes like mint?

Submissions should include the below information attached by string. You can print off below or attach a 3x5 card.

Balls are available at the Orleans County CCE (Fairgrounds), entry is free for ages 2-18.

Evaluators will select three planets by age to win an electronic telescope!

All submissions should be turned into the fairgrounds (inflated) by 12:00 pm on April 8, the day of the eclipse! They can be turned in any time prior as well.
